

OUTRAGED by EXPENSIVE WIFI HOTSPOTS? ENJOY COFFE, ENJOY WIFI

JOIN THE FON COMMUNITY AND ENJOY WiFi EVERYWHERE

FON is the world's largest WiFi community. Our members, called Foneros, share some of their home internet connection with other members of the Community, and exchange, connect for free anywhere in the world where there's another Fonero sharing.

Our vision of a WiFi Planet is possible through FON's compact, safe and inexpensive WiFi router, the La Fonera, that allows everyone to share WiFi in a secured environment.

Becoming a Fonero is really easy and only requires three simple steps: Register with FON at www.fon.com. Purchase a La Fonera WiFi Router from the online FON Shop at shop.fon.com. Register and install the La Fonera WiFi Router so that your WiFi location will appear on the FON Maps for the whole FON Community to enjoy.

WHAT MAKES FON THE IDEAL COMMUNITY for SHARING

Besides being the largest WiFi Community in the world with the most extensive coverage, FON also uses the La Fonera, its state-of-the-art WiFi router to make sharing easy, safe, and open the door to the FON Community.

In simple terms, a WiFi router is a hardware device that allows you to access the Internet without cables with your WiFi enabled personal computer, laptop, and other gadgets (phones, MP3 players, digital cameras, or game consoles).

But the La Fonera is the safest way to share WiFi. FON's compact WiFi router makes sharing safe by emitting a private and a public signal. The first private one is for the owner's own individual use while the second one is strictly for other FON users.

How can I BENEFIT FROM FON?

Share and get Free WiFi Everywhere! Become a Linus. When you have installed the La Fonera at home and share WiFi with the FON Community, you will be able to connect for free to any
